

## New Products for You in Chemical Synthesis

We remain dedicated to supporting all your explorations by making the latest innovations in chemistry accessible in a bottle. We partner with the brightest minds in chemistry and have highlighted a few of our newest products below. Please visit our website to view all our new products or suggest additions to our catalog.

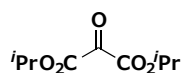

903728

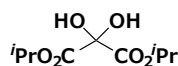

904694

### Photocatalysts

Visible light photoredox catalysis is a powerful tool in chemical synthesis. It allows one to create new bonds and facilitate rapid assembly of complex products. Our ever expanding photocatalyst offering includes Ir and Ru catalysts as well as organic photocatalysts

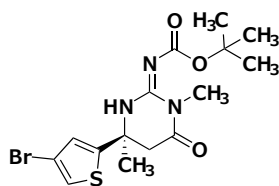

902594

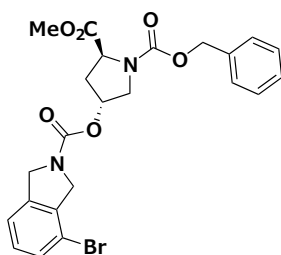

902764

### Kurti Amination

Lazslo Kurti's research lab has developed a new approach to synthesize diverse secondary amines that is a simple, scalable, and greener alternative to transition-metal-catalyzed C–N cross-coupling methods, made accessible through our six new Kurti reagents.

901781

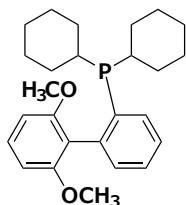

901735

### Informer Library

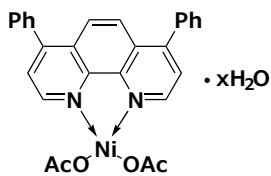

Developed by chemists at Merck & Co, this library contains 18 drug-like molecules representative of those encountered in complex synthesis. By screening a new reaction against the Informer Library, chemists can directly compare and analyze a reaction's successes and shortcomings across different methods in a reproducible manner. It may also be used to facilitate deeper method development for performance or utility.
